

Bootstrap 3 Media Query Breakpoints

Bootstrap 3 is a mobile-first front-end framework. I've included the correct order for the Media Queries below, but I've also included at the bottom of them the non-mobile first breakpoints in case some people aren't used to the mobile-first methodology since technically both will work.

Min-Width: Refers to everything greater than or equal to the amount given.

Max-Width: Refers to everything less than or equal to the amount given.

```
/*===== Mobile First Method =====*/

/* Custom, iPhone Retina */
@media only screen and (min-width : 320px) {

}

/* Extra Small Devices, Phones */
@media only screen and (min-width : 480px) {

}

/* Small Devices, Tablets */
@media only screen and (min-width : 768px) {

}

/* Medium Devices, Desktops */
@media only screen and (min-width : 992px) {

}

/* Large Devices, Wide Screens */
```

```
@media only screen and (min-width : 1200px) {  
  
}  
  
/*===== Non-Mobile First Method =====*/  
  
/* Large Devices, Wide Screens */  
@media only screen and (max-width : 1200px) {  
  
}  
  
/* Medium Devices, Desktops */  
@media only screen and (max-width : 992px) {  
  
}  
  
/* Small Devices, Tablets */  
@media only screen and (max-width : 768px) {  
  
}  
  
/* Extra Small Devices, Phones */  
@media only screen and (max-width : 480px) {  
  
}  
  
/* Custom, iPhone Retina */  
@media only screen and (max-width : 320px) {  
  
}
```
